one of the funniest and most enjoyable point and click adventure titles I have played since the Lucas Arts days. A few puzzles that have to just drill through conversation trees, but still very enjoyable and worth playing. quirky sense of humor, and fun simlish talking. Heres a video of the first "puzzle room" in case youre curious how it plays.. very nice game, a bit too hard for the kids but I had a lot of fun. You'd think the basic premise is as crazy as it gets: you play as a recently laid-off street-sweeper who sees no easier way of improving his situation than to oust the emperor. But no! As you'll quickly find out, that's just the beginning of the madness - and your journey between here and there will be anything but straightforward. You'll meet plenty of outlandish, bizarre characters - starting with your best friend Martin, a self-proclaimed psychic, who'll seem completely bonkers at first, but will actually guide you through the adventure with his cryptic but strangely insightful hints. The steampunk Austria-Hungary is populated by various strange figures that sometimes don't quite fit - but then also some historical figures whose presence makes perfect sense both in the setting and the gameplay itself, rather than being just posterboys for the epoch. The game really delivers on the steampunk factor, too. You'll actually get to operate a blimp and meet steam-powered automatons. There's actually so much love for other sci-fi genres - and technology in general - sometimes very straightforward, sometimes laugh-out-loud hilarious, sometimes brilliantly meta. Or just all-out crazy. Gameplay-wise it's more or less a classic

point&click: you go around talking to people, picking up objects & using them on other objects - with an occasional arcade game challenge or a more abstract logical puzzle. That said, the game will keep you on your toes: you'll go some strange places and do some very weird things. There's really no telling where the story will throw you next. The puzzles fairly easy for the most part - and when in doubt, you'll have Martin to help. Though it does get quite tricky towards the end. And all-out crazy in that one section. The graphics and animations are stylish and fun. But what really makes the game stand out is the audio. The splendid soundtrack aside - featuring some classic masterpieces, including that blatant Imperial March ripoff that was composed 60 years before Star Wars - the voicework deserves a special mention. All dialogue lines are fully voiced - except in a way that adds another layer of crazy to this mad, mad game.. Creators promised a good point and click game. They delivered in spades. Humor in this game really resonated with me, puzzles were tough but fair, I literally laughed out loud a few times and I loved the soundtrack. If you like point and click adventures give this game a try, you'll love it.. Viktor is a very enjoyable point and click adventure. It is humorous, self-aware and satirical. The puzzles can be perplexing, but are not outside logical though and thus provide ample challenge. For anyone really stuck, I have a playthrough for you to watch The characters are all remarkable, including historic literary figures such as Franz Kafka. Graphically, the handdrawn art style is full of charm and is very easy on the eye. The game will take around 6 hours to complete, but there are multiple solutions to problems so it has some limited replayability. All in all, for the price, a good point and click adventure.. Amazingly silly, the worldmap you get in the game is worth the price by itself. I don't really know what to write about the game other than that it may crave some knowledge about the world and its history to get all the jokes and I'd guess being more than a couple of years old is also a good thing if you want to enjoy it, me personally have an aching stomach due to all the laughs, love it so far and I haven't even left the apartment. (seing the map just had me ROFL and I felt I needed a break before continuing) Great stuff dev's, great stuff.
